NIAT Growth Audit

Layer 1 | Public-source review | 15 October 2026

What NIAT actually is

NIAT is NxtWave's four-year technology upskilling program delivered at collaborating institutions for students after Class 12. It teaches practical tech skills and issues its own certificate; the university separately decides admission and awards the B.Tech degree. NIAT enrolment runs through an application, a paid NAT assessment, one-to-one career counselling and a separate enrolment step. A NAT result is not university admission. (NIAT process · official FAQ)

Acquisition and conversion avenues already visible

Free AI build experiences | Acquisition. The AI Bootcamp, weekly AI Challenge and Solvers League invite school leavers to build projects and register for follow-up. (Bootcamp · Challenge · Solvers League)

Social proof | Acquisition and nurture. YouTube parent stories and LinkedIn student/project posts make the program more tangible; NIAT also maintains an Instagram account. (YouTube · LinkedIn · Instagram)

Creator partnerships | Acquisition. AI creator Tanishq Jain publicly lists an ongoing NIAT campaign of 15 videos, placing the brand in creator-led content. (creator disclosure)

Teacher network | Acquisition. Super Teacher puts NIAT in front of educators; its page reports training 2,000+ teachers across 500+ schools. (Super Teacher)

Campus pages and outcomes | Conversion. Institution-specific pages, internship stories, brochure requests and counsellor calls help families evaluate options and enquire. (campus directory · internship stories)

NAT, counselling and scholarship | Conversion. The paid test qualifies prospects; a counsellor suggests a collaborating university, and NAT/profile/counselling can affect an up-to-₹2 lakh NIAT-fee scholarship. (NAT process · scholarship FAQ)

WhatsApp | Conversion. The official site provides a direct WhatsApp contact for questions after initial interest. (NIAT site)

Brief-reported only: offline school/inter-college events, campus activations, counsellor networks and performance ads were named in the challenge brief; current campaign operations were not independently verified.

Two closest direct competitors

Scaler School of Technology. Clearer cost comparison: it publishes year-by-year tuition, hostel and parallel-degree fees; NIAT says institution-specific fees are given after NAT/counselling. (Scaler fee table · NIAT fee FAQ)

Newton School of Technology. More decision-useful internship reporting: it publishes second-year paid-internship rates by campus (98.3% Pune; 93%+ Delhi), while NIAT highlights 200+ paid offers without a cohort denominator. These are operators' published figures. (Newton outcomes · NIAT internships)

The hidden detail

NIAT's homepage explicitly says some headline outcomes cover multiple NxtWave programs, including online cohorts and placement-support programs. Those figures should not be read as NIAT-only outcomes when speaking to a parent or proposing a growth claim. (NIAT outcomes disclaimer)
